III. DESCRIPTION OF FINDINGS & CONCLUSIONS

This renewal inspection involved a review of all applicable child care home administrative rules and statutes. Verification of compliance included direct observations of the physical environment and the program, discussions with staff, and a review of the home's records, including staff records and children's records. Staff records include background checks, medical clearance information, and training information. Children's records include child information cards and child in care statements/receipts.

During my onsite inspection I observed free play and clean up time. Interactions between Ms. Hunter and child care children were positive.

During the inspection, the child care home was found to be in compliance with all applicable rules and statutes except for the following violations:

R 400.1941 Heat-producing equipment.

(5) The inspection specified in subrule (4) of this rule must be conducted before the initial license is issued and every 4 years thereafter at the time of license renewal.

The last furnace inspection was completed in 2018, a new one is required for the 2022 renewal, but was not completed.

IV. RECOMMENDATION

I recommend issuance of a regular child care license to this group home (capacity 7-12).
