II. Purpose of Addendum

The Licensee submitted a request for modification to the terms of the license to increase the upper age range on the face of the license from 6 years to 10 years.

III. Methodology

On 02/10/2004, the Licensee submitted her modification request.

An onsite visit was made to the childcare center on 05/13/2004 for a renewal inspection. Measurements of the childcare center were taken at that time, as they were not previously documented in the case file.

IV. Description of Findings and Conclusions

The Licensee has an appropriate variety of equipment and learning activities to accommodate school-age children up to the age of 10 years.

The childcare center has 2 toilets and 2 hand sinks.

The center has 2 main rooms used for childcare. The room at the west end of the building measures approximately 32' by 22' and is divided into 2 use areas. The south side of the room is used for children between the ages of birth and 2 years 6 months and measures 352 sq. ft., which is adequate space for 7 children. The north side of the room is used for children between the ages of 2 years 6 months and 10 years and measures 352 sq. ft., which is adequate space for 10 children.

The room on the East end of the building measures approximately 22' by 19'. This room is used primarily for children between the ages of 2 years 6 months and 10 years and measures 399 sq. ft., which is adequate space for 11 children.

V. Recommendation

I recommend that the face of the license be changed to reflect the age range of birth to 10 years and a change in total capacity from 30 to 28.

Licensing Consultant
