### A. Description of Facility

The Plainwell MSRP program was relocated to Starr Elementary for the 2007-2008 school year. The program will occupy Room 501 in Starr Elementary. This school was constructed in 2005.

There is a spacious classroom with space to designate various learning areas such as dramatic play, sensory, reading and circle time. The main classroom area measures 31 x 25 or 775 square feet. There is space section off behind the teacher's desk identified as the "small group" area used for reading and testing of skills. This space measures 9 x 10 or 90 square feet. In total there is adequate space to support a licensed capacity of 18 children for the program.

There is one toilet and one hand washing sink in the classroom. Enrolled children will also use the restrooms located outside the classroom in the hallway. There is a separate facility for boys and girls. There is one toilet and one hand washing sink in each restroom. There are adequate restroom facilities for the licensed capacity of 18 children.

Teddy Walker, CPSI, inspected the school playground in August of 2007. The report identifies through the use of pictures items not approved for use by children ages 2-5. The program will not use these playground items. The outdoor play area is partially fenced. There are no water hazards.

An fire safety inspection was conducted on July 10, 2007.
